### ***DETAILED ACTION***

Claims 1-6 and 8-21 are pending in this application.

### ***Response to Restriction***

Applicant's argument was persuasive and therefore, the restriction requirement of the Office Action mailed on 14 December 2004 is hereby withdrawn. Therefore, claims 1-6 and 8-21 have been examined on the merits.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-6 and 8-21 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Pat. No. 6,310,080 B1 and claims 1-20 of US Pat. No. 6,458,785 B1. Instant claims 1-6 and 8-21 are directed to compounds

of Formula  as defined in claim 1, and their method of use in the treatment of AIDS. US Patent No. '080 teaches compounds of Formula

and their methods in treating AIDS. US Patent No. '785 teaches

compounds of Formula  and their method of use in the treatment of AIDS. The claims of this application are not identical to the claims of either said patents, however, both said Patents already cover the subject matter claimed in this application. The only difference is the claims of this application claim a narrower definition of R2 ( which is limited to a benzyl group).

In the absence of an obvious result, selecting compound with narrower definition of some variables that have broad definitions is considered, *prima facie*. Both said US Patents provide motivation for the instant invention in the generic teaching (see claim 1 of both Patents).
